

# Medical Dispenser Packaging

Welded or with clips

Optinova provides dispensers welded or assembled with clips, luer, connectors etc. according to customer specifications. The dispensers are made from in-house extruded tubing in materials such as HDPE or PTFE. Our assembly equipment accepts large versatility of dispenser design. With our high production output, dispenser produced by Optinova is a cost-effective choice.

**Optinova offers a wide variety of dispensers for applications such as:**

- **Guide Wires**
- **Catheters**
- **Sensors**
- **Leads**

Optinova Ab is certified according to ISO 9001:2000 and ISO 13485:2003 operating under cGMP guidelines. The tubing is produced from medical grade virgin materials. Production takes place in a clean room environment according to ISO 14644 -1. All our deliveries include Test Report and Certificate of Conformance.
