

ICM-2™ PTFE IV-CATHETER TUBING

Optinova: Since 1971 as a world-leading supplier of IV-catheter tubing.

Based on our vast experience we have developed our ICM™ tubing concept; a concept that includes a range of specially produced tubing in the most commonly used materials for IV-catheters, giving customers various choices and opportunities.

ICM-2™ IV-catheter tubing is made from PTFE which is an excellent material selected due to its outstanding low friction.

Optinova Group is certified according to ISO 9001 and ISO 13485. Production takes place in a clean room environment according to ISO 14644 -1

www.optinova.com

High quality

- Tight tolerances
- High concentricity
- Batch-to-batch consistency
- Clean room production

Excellent service

- On-time delivery
- Test Report and Certificate of Compliance for traceability
- Technical support from experienced engineers
- Education in material properties
- Biocompatibility documentation

Additional features

- Available in dimensions according to customer specification
- Various configurations such as transparent BiO2CO3 filled or striped
- Supplied in cut length or on spools
- Double, sealed plastic bags
